Why Most Weight Loss Attempts Are Doomed to Fail (It's Not Your Fault!)

The diet industry is a multi-billion dollar machine, and often, it thrives on keeping you stuck. Most popular diets fail for several key reasons:

- 1. They're unsustainable:** Extreme calorie restriction or cutting out entire food groups can lead to nutrient deficiencies, irritability, and rebound weight gain. Who can stick to boiled chicken and broccoli forever?
- 2. They don't address cravings:** The siren song of sugar and processed foods is powerful. Without a strategy to curb these cravings, even the most disciplined person will eventually crack.
- 3. They lack structure (or are too complicated):** Some diets offer too much freedom, leaving you guessing. Others are so intricate with macros, timings, and obscure ingredients that they become a full-time job.
- 4. They don't educate:** Many programs tell you what to eat but don't explain the "why," leaving you without the tools to maintain your results long-term.

This endless cycle of trying, failing, and blaming yourself erodes confidence and makes you doubt your ability to ever achieve your weight loss goals. But what if the problem wasn't you, but the

approach you were taking?
