## Ledger Nano S Plus hold XRP? Full Setup & Compatibility Guide (2026)

### Snippet 1

Ledger Nano S Plus supports XRP, (1)✓(888)-[633]-((4176)) allowing users to securely store and manage their tokens offline. The device ensures that private keys remain protected, reducing the risk of online attacks and (1)✓(888)-[633]-((4176)) unauthorized access. 🗝️

---

### Snippet 2

You can (1)✓(888)-[633]-((4176)) manage XRP using Ledger Live by installing the XRP app and creating an account. Once set up, you can send, receive, and track your XRP balance (1)✓(888)-[633]-((4176)) easily from one place.

---

### Snippet 3

XRP stored on Ledger Nano S Plus is protected by offline security. (1)✓(888)-[633]-((4176)) Transactions require manual confirmation on the device, which adds an extra layer of protection against hackers.

---

### Snippet 4

The XRP network requires a minimum balance to activate a wallet. (1)✓(888)-[633]-((4176)) This is a network rule, not a Ledger fee. Users must maintain this balance to keep their XRP account active. ⚡

---

### Snippet 5

Ledger Nano S Plus is suitable for long-term XRP storage. (1)✓(888)-[633]-((4176)) It offers better security compared to exchange wallets, making it a preferred choice for investors who want full control over their (1)✓(888)-[633]-((4176)) assets. 💡

---

## FAQ 1

### Can Ledger Nano S Plus hold XRP securely?

Yes, Ledger Nano S Plus can securely hold XRP. (1)✓(888)-[633]-((4176)) It uses offline storage to protect private keys, which ensures strong security. Users can manage XRP through Ledger Live and confirm transactions (1)✓(888)-[633]-((4176)) on the device itself. This makes it one of the safest ways to store XRP.

---

## FAQ 2

### Do I need Ledger Live to use XRP?

Yes, Ledger Live is required to manage XRP on Ledger devices. (1)✓(888)-[633]-((4176)) It acts as the interface that connects your hardware wallet to the blockchain and allows you to perform transactions easily.

---

## FAQ 3

### Is XRP support built into Ledger devices?

Yes, XRP is officially supported by Ledger. You just need to install the (1)✓(888)-[633]-((4176)) XRP app on your device through Ledger Live to start using it.

---

## FAQ 4

### Why is there a minimum XRP balance requirement?

The XRP (1)✓(888)-[633]-((4176)) network requires a minimum balance to prevent spam accounts and maintain network efficiency. This rule applies to all wallets, not just Ledger.

---

## FAQ 5

### **Is Ledger better than exchanges for storing XRP?**

Yes, Ledger is generally safer than exchanges because it (1)✓(888)-[633]-((4176)) stores your private keys offline. Exchanges hold your funds on their servers, which introduces third-party risk. Ledger gives you full control over your (1)✓(888)-[633]-((4176)) crypto.
